

So, you bought an EMR System but... your chart room still looks like this

You're not alone.

The majority of clinics that purchase EMR have paper problems that linger for years after their install.

It's time to reclaim your office and take the paper out of the picture.

ChartCapture can help.

Scan the complete chart, full-color, within 90-seconds or less

Automatically indexes tabbed sections and links to your EMR

Turn years of scanning work into just a few months

Shred the paper, reclaim your space and eliminate storage costs

 **ChartCapture™**
Chart Scanning... Made Simple.

View Your Paper Chart From Any Computer

ChartCapture™ gives you instant access to patient records from any computer. No more paper chart chasing!

- Physicians and staff get the patient information they need, right when they need it - in the hospital, on call, at the nurse's desk, at the billing desk.

- You get to reclaim your office space and eliminate offsite storage faster than you can imagine. Scan hundreds of charts per week!
